

Solutions & Applications

- WAN and Internet Traffic Monitoring.
- WAN Optimization.
- Application Visibility & Acceleration.
- Application Response Measurement.
- Email Archiving and Management.
- Strong Authentication & Single Sign-On.
- Unified Threat Management.
- Network Access Control
- End-point Security and Device Management
- Encrypted USB Drives.
- Patch Management for multiple platforms.
- PCI Compliance.
- Server Room Environmental monitoring.
- IP KVM and Power Distribution.
- Media Converters.

Vendors & Technologies

WAN

Exinda Networks is a leading global supplier of high quality network performance optimization and monitoring systems. Exinda's products offer network data optimization, traffic reporting and application acceleration that allow enterprises to ensure its network operation is matched to the business needs. www.exinda.com

Xtera specializes in network infrastructure. Their AscenLink aggregates multiple leased and broadband lines to increase WAN bandwidth. It distributes traffic across multiple inexpensive ISP lines like DSL or Cable Modems to deliver speeds comparable to costly leased lines such as E1/T1 or T3. www.xtera.com

Security

eToken (Aladdin Knowledge Systems) The world's leading USB-based strong authentication and password management solution ensures that only authorized individuals access your organization's sensitive information by protecting your data. Strengthen VPN security, protect data on laptops, enhance network security, simplify management. www.aladdin.com/etoken

WatchGuard Technologies; since 1996 has provided reliable, easy-to-manage security appliances to hundreds of thousands of businesses worldwide. Our Firebox X family of unified threat management (UTM) solutions provides the best combination of strong, reliable, multi-layered security with the best ease of use in its class. www.watchguard.com

SanDisk Enterprise supplies the Cruiser; a Centrally Manageable USB device with 256-bit AES Hardware Encryption. Combining complex password enforcement, brute force attack resistance and remote termination of lost drives they are the perfect way to keep data secure outside the enterprise. www.sandisk.com/business-solutions/enterprise.asp

Easy, automatic email archiving in a compact network appliance. A high-performance, low-maintenance archiving solution with all the right features for small and medium-sized companies. Includes; automatic archiving and indexing of all emails and attachments, fast, easy search and restore, a user-friendly web-based or Outlook interface. www.arcmail.com

Lumension Device Control, (Sanctuary) eliminates data loss from removable devices through the policy-based enforcement of device use to control the flow of inbound and outbound data from your endpoints. www.lumension.com
Lumension Vulnerability Management (PatchLink Update) the #1 selling patch and vulnerability management solution for 3 consecutive years. www.lumension.com

Avocent is a leading global provider of IT infrastructure management solutions for enterprise data centers, small/medium businesses and branch offices. Products include local and remote switching, serial console servers, digital extension, embedded (IPMI), service processor managers, wireless, mobile and video display solutions. www.avocent.com

AKCP is a manufacturer of SNMP-based environmental and security monitoring solutions. The sensorProbe, can be connected in any combination to monitor temperature, humidity, water leakage, Airflow including long term graphing, security, detect AC Power Line Voltage, Digital Voltmeter, control relays, and much more. www.akcp.com

Server Technology, Inc. designs and manufactures power distribution products to reduce downtime and improve data center power management. Intelligent Power Distribution Units provide power management via IP, branch circuit protection, input current power monitoring, environmental monitoring, serial console port access. www.servertechnology.com

ForeScout's Network Access Control (NAC) is the only solution that delivers uniform policy enforcement across all network devices without causing any service disruptions or downtime. Clientless and transparent to the end user, ForeScout's NAC features a wide range of response options to policy violations, to combine an unprecedented level of security and business continuity. www.forescout.com

Digi International, the leader in device networking for business, develops reliable products and technologies to connect and securely manage local or remote electronic devices over the network or via the web. www.dialogic.com

IMC Networks is a leading manufacturer of optical access and media conversion solutions for LAN, MAN and FTtx applications. With millions of products shipped, IMC Networks' solutions have been deployed in enterprise, government, education and service provider networks worldwide. www.imcnetworks.com

PowerDsine (MicroSemi) is a leader of the fast-growing Power over Ethernet (PoE) technology that allows power to be transmitted over the same network cable as data. PowerDsine has been a pioneer in the development of the Power over Ethernet market place from its inception. www.microsemi.com/PowerDsine
